

VEM SERIES

STAINLESS STEEL
HYDRAULIC FILTER

SERIE VEM

VEM strainers are specially designed for high particle retention, easy maintenance, and excellent efficiency in harsh operating conditions. Their bowl houses a large cartridge for longer operating life and reduced servicing times.

The tri-clamp connection to the strainer body allows a quick removal with no tools. Removable bottom plug for easy screen cleaning.

The **tri-clamp fitting** guarantees a safe, uniform, and smooth union of the parts and consequent ease of cleaning and minimum risk of residues that can affect the quality of the product.

The tri-clamp connection is often used in systems where it is essential to comply with sanitary standards.

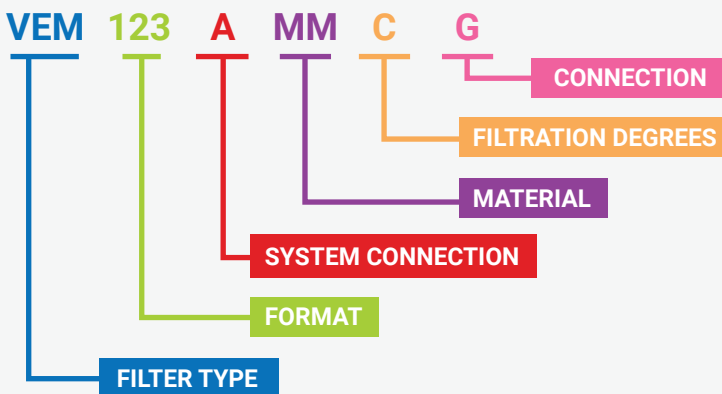

316L stainless steel is highly resistant to corrosion. It does not alter the filtered liquid's color, smell, and taste and is resistant to very high and shallow temperatures.

The quality/price ratio is highly advantageous, thanks to the long operating life of the filter made of 316L stainless steel.

The stainless steel corrosion resistance allows using the VEM filter in saline environments and marine areas, in environments with a high concentration of chemical substances, and in general where adverse operating conditions occur.

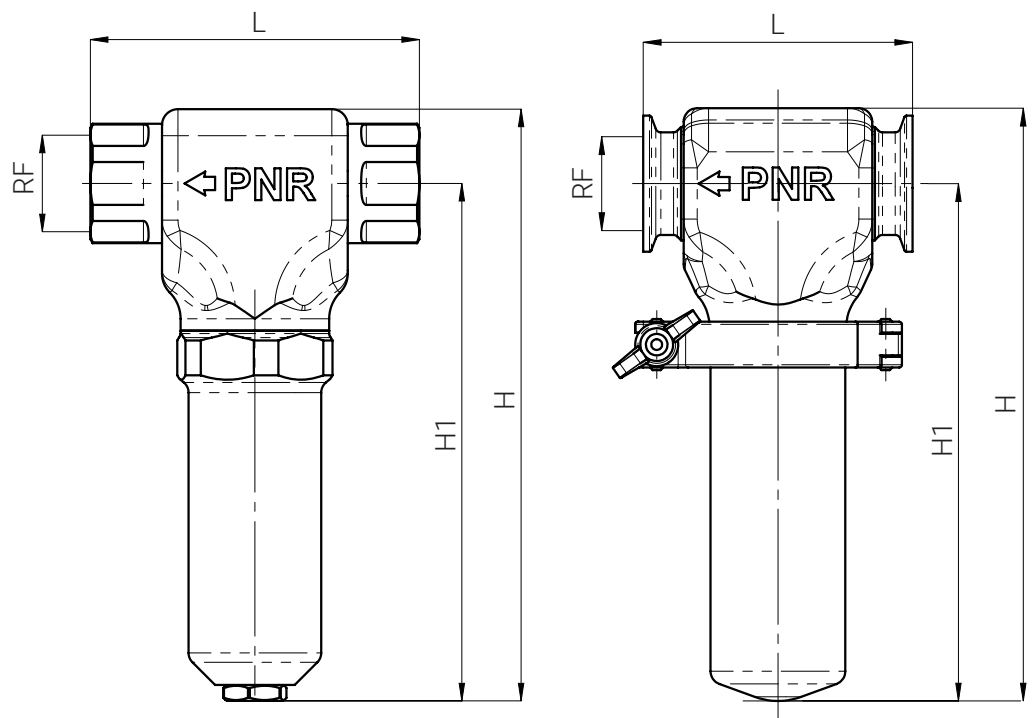

PNR CODING

THREAD SIZE	1/2", 3/4", 1"
TRI-CLAMP DIMENSIONS	1-1/2" line, 2" body
WIRE NET MESH SIZE	60-75-100 mesh
MAX WORKING PRESSURE	14 bar
MAX CAPACITY	14 lpm
MATERIAL	AISI 316L
TYPICAL APPLICATION	Filtering before spraying liquids
