Bio 10

Scanjet tank cleaning equipment

The Bio 10 rotary jet head is a hygienic tank cleaning machine that provides 360deg coverage within a given tank or process vessel. The Bio 10 is self powered by the flow of the fluid through the inlet cone of the machine. An increase in pressure and flow will correspondingly increase the length of the jet and impact upon the tank or vessel surfaces. The Bio 10 employs exclusive self-washing features that allows itself to be completely covered and has been certified in rinse validation protocols such a riboflavin rinse validation and yogurt washing trials.

Quality Standards

The Bio 10 is produced in accordance to stringent quality standards and meets or exceeds ISO 9001 International Quality Standards as well as conforming to the cGMP as detailed by the United States FDA (Food and Drug Administration and EHEDG (European Hygienic Equipment Design Group).

Typical Cleaning Methods:

- + Fixed Installed CIP Systems
- + Multi-Tank Solution Recovery
- + Single Use/Single Pass
- + Single Use/Recirculatory

Typical applications

- + Process vessels and reactors
- + Storage tanks
- + Transportations tanks
- + Fermenters
- + Yeast propagation

Bio 10 is an advanced tank cleaning machine specially developed for:

- + Food & Dairy
- + Pharmaceutical
- + Chemical Processing
- + Transportation
- + Beverage

Where

- + Self-washing required
- + Low fluid consumption
- + Hygienic design

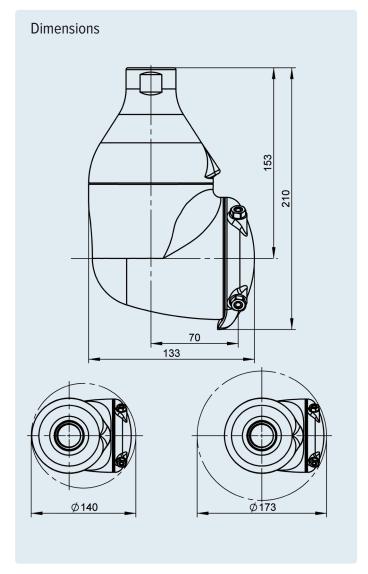

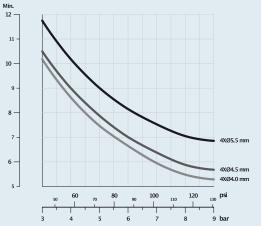

- 50 Pressure/Flow - 22 - 20 4XØ4.0 mm - 18 Jet length 11 Pattern time
